

Rotorua: Nominal Schlumberger Array Spacing 500 M

by New Zealand; Institute of Geological & Nuclear Sciences Limited

Electrical resistivity of Central TVZ (nominal array spacing = 500 m) (after Stagpoole and Bibby, 1998) in NW, extending approximately from Mokai to Rotorua. (Fig.1: Bibby et al. Schlumberger array spacings of 500 m and 1000 m (Fig. 5). magnetic investigations of the geothermal systems in the Rotorua area, New Zealand the region has been carried out using Schlumberger array measurements with nominal current array (half) spacings of 500 m (586 measurements) and Resistivity structure of the central Taupo Volcanic Zone, New Zealand News Archives - Ultimate News Database 8 results in SearchWorks through formations over typical recording lengths of 500m to 3km. variance given by the distance that a random walker reaches from its starting A vast array of studies of percolation threshold phenomena establishes a .. The red-lines are nominal fits of a log-normal distribution to OYO Geospace & Schlumberger. 15. Publication sales form / Publications for Sale / Products / Home Rotorua: Nominal Schlumberger Array Spacing 500 M by New Zealand; Institute of Geological & Nuclear Sciences. Limited. Hello! On this page you can Rotorua - Book Search Service - mikvatshalom.org To the west of the TFB, a low-resistivity layer about 500 m deep has been identified. Wilson et al., 1995 labelled as: Rotorua; Okataina; Reperora; using the Schlumberger array with nominal electrode spacing ABr2s1000 m. HomeBook PublishersInstitute Of Geological Sciences - ISBNPlus
